4

5

When the rupture disc may be subjected to conditions of vacuum or counter-pressure a support of adequate design and resistance may be required.

The selection of support type is guided by disc type and operation conditions Vacuum / counter-pressure supports supplied. The SDD are of 5 types:

1. Flat grid
2. Convex grid
3. Finned
4. Slotted in sectors
5. Slotted along the circumference

See Technical Properties below...

Type	Grid	Finned	Slotted
Materials	Stainless steel, Nickel, Hastelloy, Inconel, Monel.		
Dimensions	15 - 900	32 - 400	15 - 800
Opening	Reduced	Reduced	Total
