

Declutchable gears

Type MGO

Our own manual override with no traditional mounting flange to have a as compact unit as possible. Body of Anodized Aluminum in black colour as standard, other finishes avialable.

MGO has an unique design with interchangeable inserts (same as on Type 2 actuators). These features makes it perfect for direct mounting and for stock keeping..

The actuators comply fully with all the relevant industry standards for interfaces and connections such as ISO 5211, DIN 3337,
