\* = gearbox recommended, \*\* = with gearbox only. Dimensions in [mm], weights in [kg]. Dimensions of welding ends according to the dimensional table or customer requirement. Dimensions for PN 160 upon request.

**Type designation**

### Application

Isolating valve designed to fully open or close the service fluid flow. It is not designed to be used for throttling or regulating purposes. For temperatures up to +500 °C (for temperatures above +400 °C for non-oxidizing fluids only).

Suitable for:

- water, steam, gas, oil, heat transfer fluids and other liquids and gases without mechanical impurities.

Approved for:

- fluids in groups 1 (hazardous) and 2 according to 2014/68/EU.

### Characteristics

- floating ball,
- full bore,
- anti-static design,
- stem secured against release (anti-blow-out).

### Operation

- hand lever,
- hand wheel with worm gear,
- pneumatic actuator,
- electric actuator.

### Compliance with standards

- EN 1983,
- EN 12516-1,
- EN 17292,
- EN 12982 series 68,
- EN ISO 5211,
- EN 13463-1 (ATEX) – II 1 GD Ex IIC TX, I M1.

### Testing

- EN 12266-1, leakage rate A – zero leakage.

### Optional accessories, adjustments and services

- different end-to-end dimensions or end combinations,
- connection for actuator according to ISO 5211,
- fire-safe design – fire resistance in accordance with EN ISO 10497 (API 607),
- heating jacket – for keeping the fluid liquid,
- lockable handle with a padlock,
- extended stem – e.g. for the reason of insulation of the valve and pipeline,
- design according to TA-Luft or EN 15848-1,
- limit switches,
- documentation according to EN 10204 3.2,
- special adjustments according to customer requests,
- design according to standard NACE MR 0175 or ISO 15156.

### Pressure-temperature graph
