

FLOAT AND THERMOSTATIC STEAM TRAPS FLT314TW

DESCRIPTION

The ADCA FLT314TW is a series of high capacity float and thermostatic steam traps with integral air vent, designed for modulating discharge of condensate to ensure maximum system heat transfer.

Specially designed for applications where continuous drainage is essential and high loads are involved.

MAIN FEATURES

High capacity.

Modulating discharge of condensate at steam temperature.

Unaffected by sudden or wide load and pressure variations.

No backing-up with condensate.

Excellent air discharge through its integrated thermostatic air vent.
